Maximise the use and reuse of your research through a variety of article types

CONCEPT

Review
- Provides a balanced and comprehensive summary of the latest discoveries in the field which can be cited in subsequent articles.

PLANNING

Study Protocol
- Allows researchers to present their rationale and proposed methods for their study and get these peer reviewed.

Method Article
- Can be used to present new methods or modifications of existing methods.
- Methods support robust, reproducible research, and research training while ensuring those who developed the method are given credit.
- Can be updated as the method is refined.

Brief Report
- Brief reports allow researchers to share small preliminary studies, describe unexpected or unexplained results or small finding that traditional would be hidden away in supplementary materials.
- Can be described using a few illustrations or even a single figure.

DATA COLLECTION

Brief Report
- Publishing a Brief Report during the data collection stage of your project allows you to analyse a sub-set of the data and to validate it.

Data Note
- Allows researchers to present their data openly in a highly discoverable, useable, and reproducible way ensuring they get both recognition and credit for their data.
- Data Notes can then be linked to any subsequent research articles using the data.

Software Tool Article
- Software tools and code are themselves a research output.
- Software Tool articles therefore improve the transparency, visibility and reproducibility of algorithms, code, workflows etc. developed as part a research project, while ensuring the researchers and any associated developers are credited.

Method Article
- A Method Article can be produced alongside a Software Tool Article to provide detailed operational instructions to facilitate reuse.

ANALYSIS

Research Articles
Writing a Research Article at the analysis stage of a research project is now really easy:
1. Published Reviews, Study Protocols and Methods are citable.
2. Data, relevant code and software is already available and can be linked and cited.

Brief Report
- Ensures that findings outside the scope of the Research Article are made accessible.
